Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12/15/05.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Blair (US 5,304,145), Chandler (US 5,468,229) (Column 2, Line 25), Bennes et al (US 5,853,396), Sutherland et al (US 6,126,639) (Column 3, Line 58), Lee (6,436,074) (Column 3, Line 26), and McDaniel (US 6,544,232). The prior art discloses a peritoneal dialysis security band comprising an elastic band that is continuous, a catheter retaining pocket positioned along a portion of said elastic band, wherein said pocket is able to accept a catheter.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Blair, Chandler, Bennes et al, Sutherland et al, Lee, and McDaniel. The prior art does not

Art Unit: 3763

disclose expressly that the elastic band has a width from about 3 inches to about 6 inches. At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to make the band from about 3 to 6 inches in width because Applicant has not disclosed that these dimensions provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with either the dimensions taught by the prior art or the claimed 3 to 6 inches because both dimensions perform the same function equally well. Therefore, it would have been an obvious matter of design choice to modify the prior art to obtain the invention as specified in Claim 7.

Response to Arguments

Applicant's arguments filed on 12/15/04 have been fully considered but they are not persuasive. Applicant states that the cited references of prior art do not disclose a "continuous elastic band." Examiner respectfully disagrees. Applicant recites in Claim 1 that the elastic band is continuous. Examiner believes that all the elastic bands of the prior art of reference are indeed continuous. For example, they are all continuous along at least one portion of the whole band. Whether one takes a horizontal portion of the elastic bands or a vertical portion of the elastic bands, one will find continuity.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
